

My family/friends all listen to air1 radio exclusively. We support their station financially, and it serves to minister to us and our families like none other. It is the only source of contemporary christian music in our community, and we need it! If air1 radio was to be replaced, we would have a void in our community. There are no other contemporary christian stations in Amarillo any longer. No other outlet is playing this kind of genre in our community and it would leave a terrible hole for the listeners who depend on air1 to deliver their music of choice. Air1 represents values, ethics and moral standards that are not represented in any other genre of music available to our community (and many others as well). The replacement of air1 would be a devastating and unfair action. The number of listeners is such that WE fund the station...we pay for it, so we should be able to have it to listen to. We choose air1...so please let our choice be heard.
